### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Patrick Buckley, Reg. No. 40,928 on 07/17/2007.

The application has been amended as follows:

Amending claims 1, 15, 19, and 24 as seen in the attached pages 2-6.

Cancelling claims 11-14 as seen in the attached pages 2-6 since limitations cited in claims 11-12 are already incorporated into all independent claims 1, 15, 19, and 24 and claims 13-14 are cancelled due to withdrawn.

2. Claims 1-10, 15, 17-21, 23-26, and 28 are allowed.
3. Claims 11-14, 16, 22, and 27 are cancelled.
4. The following is an examiner's statement of reasons for allowance:

The prior art of records fail to disclose or render an obviousness of a method, article, and a computer searching for a matched sequence of bits comprising: applying a message digest function to the selecting predetermined bits from stream; determining by

comparing whether a pattern of bits resulting from above message digest function matches a predefined pattern stored in a search table and further comparing to a second predefined pattern stored in the search table when the resulting pattern of bits matches the predefined pattern, wherein the search table includes: a root table, at least one trie sub-table, at least one strand sub-table, at least one match sub-table, and at least one wildcard sub-table along with other features/limitations as cited in independent claims 1, 15, 19, and 24.

The closest found prior arts are Moreno (U.S. 7,065,544) and Fridrich (U.S. 6,101,602). Moreno in view of Fridrich discloses a method of searching for a match sequence of bit-stream comprising the comparison to the stored predefined pattern. However, Moreno in view of Fridrich fails to explicitly disclose a detail searching for a matched sequence of bits comprising multiple comparison with predefined patterns which stored in a search table includes: a root table, at least one trie sub-table, at least one strand sub-table, at least one match sub-table, and at least one wildcard sub-table as seen above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
